Company Layoff Analysis

This dashboard provides an in-depth analysis of company layoffs across different industries, years, and funding stages. It visualizes trends in layoffs, correlates them with funds raised, and identifies the most affected industries and companies.

Key Insights:

- 1. Layoffs peaked in 2023, accounting for 47.84% of total layoffs.
- 2. The most affected industries include Media, Tech, and Finance.
- 3. Companies like Amazon, Meta, and Google reported the highest layoffs.
- 4. Monthly layoffs showed significant spikes in January and March.
- 5. Companies that raised funds in Series A, B, and later stages experienced notable layoffs.

Flowchart Overview:

The flowchart (to be included) outlines the process of data collection, preprocessing, and visualization used to generate the insights in this dashboard.
